OPENING FEATURES

FEATURES IN THIS SECTION CAN BE CHOSEN FOR UNLIMITED TIME AT YOUR DEVICE.

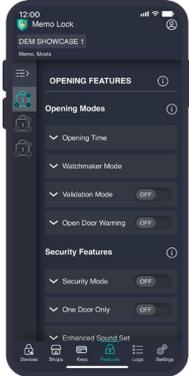

Tap "Features" from footer menu.

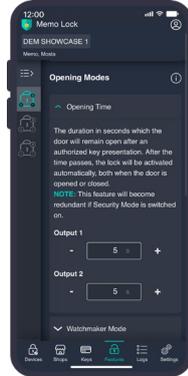

Enable/disable any feature of this section.

OPENING TIME

Select the duration that the lock enables door opening.

Tap ∇ to open "Opening Time" feature details.

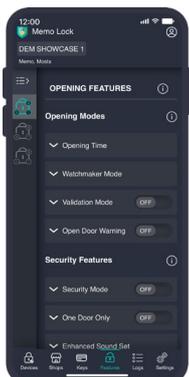

Change time accordingly.

On successful setting change, a notification will be shown.

WATCHMAKER MODE

Put the system in a locking mode, as a mechanical key – OPEN and it stays open – LOCK and it stays locked.

Tap ∇ to open "Watchmaker Mode" feature details.

Enable toggle accordingly.

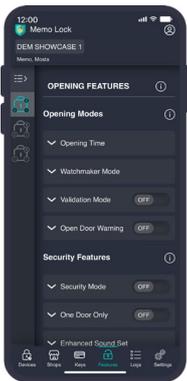

On successful setting change, a notification will be shown.

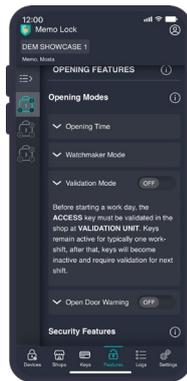

VALIDATION MODE

Keys must be programmed to be authorized in a shop. In the beginning of every work day, the ACCESS key must be VALIDATED to open a door/drawer.

ALL keys past the validation time will not open, therefore, any LOST or STOLEN keys will not work. This increases the security against un-authorized usage of LOST or STOLEN keys.

Tap ▼ to open “Validation Mode” feature details.

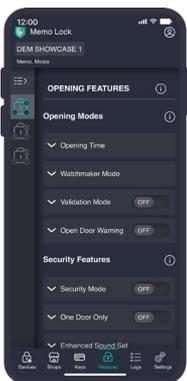

Enable toggle and set time accordingly.

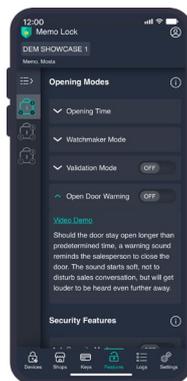

On successful setting change, a notification will be shown.

OPEN DOOR WARNING

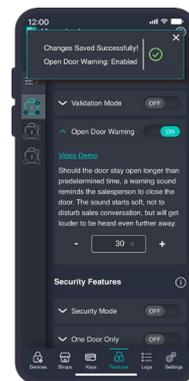

A warning sound reminds sales staff to close an open door/drawer after a set amount of time. Experiment and find the perfect setup for your personal situation.

Tap ▼ to open “Open Door Warning” feature details.

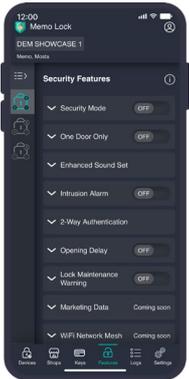

Enable toggle and change time accordingly.

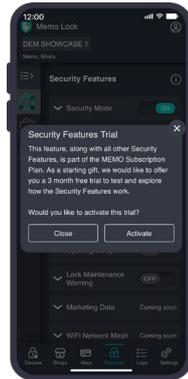

On successful setting change, a notification will be shown.

SECURITY FEATURES

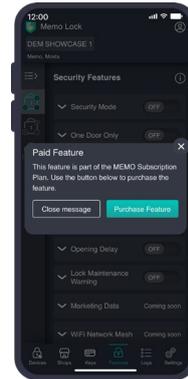

Features in this section can be tested for a trial period of 3 month, giving you the opportunity to find the perfect combination, after 3 month a FEATURE SUBSCRIPTION must be ordered via memolocks.com Order platform.

Enable/disable any feature of this section.

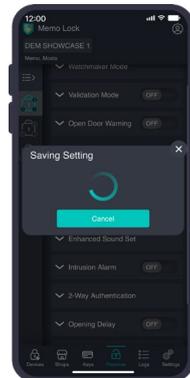

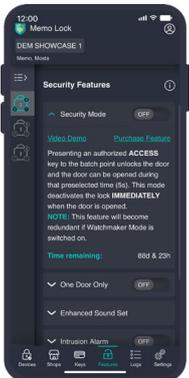

At first feature selection a window is opened to advise about the trial period.

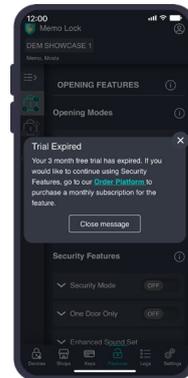

In case the trial is expired, a message will inform to purchase a feature subscription.

When clicking on "Purchase Feature" the user is redirected to our [Order Platform](http://memolocks.com).

Every setting is explained in the drop-down and some features have a video introduction.

A dedicated "Purchase Feature" button redirects to the memolocks.com in [Order Platform](http://memolocks.com), where you can explore and acquire the feature seamlessly.

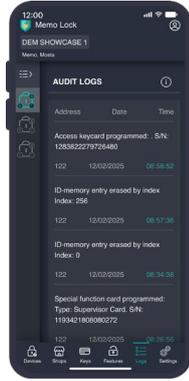

When the trial period is expired, a message will show up and Security Features will be automatically turned off.

AUDIT LOG DATA FOLLOW THE STEPS BELOW:

Tap on “Logs” icon in footer menu.

A list of key transactions and other informative device logs is presented.

UPDATE DEVICE FIRMWARE FIRMWARE UPDATES OVER THE AIR KEEP YOUR DEVICE UP-TO-DATE.

Tap “Settings” from footer menu.

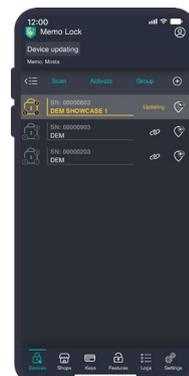

Tap ▼ to open “General Settings” and scroll down to “Update Device” button.

In case the device is already updated to the latest version, “Update Device” button is disabled.

Tap “Install Update” to install the latest device version.

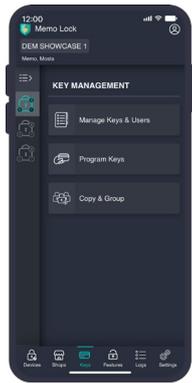

A confirmation message will be shown once update started, device will be shown in “Updating” state in the Devices menu.

During Update, the device is not available for normal operation. After update is finished, tap “Devices” and “Scan” button to scan and use the device again.

CONNECT TO NETWORK

WIFI CONNECTION IS REQUIRED FOR FIRMWARE-UPDATES, STATISTIC-DATA, LOCK MAINTENANCE WARNING, FEATURE-SUBSCRIPTION-PACKAGES AND OTHER SERVICES.

Tap on “Settings” from footer menu.

Tap **▼** to open “Network Settings” and tap “Search for networks”.

This will list all available networks in your area.

Select a network, fill in credentials and save WiFi details.

A “Connection Success Window” will be shown when your credentials are valid.

If credentials are not valid, a “Credentials Invalid Window” will be shown and asks to try again.

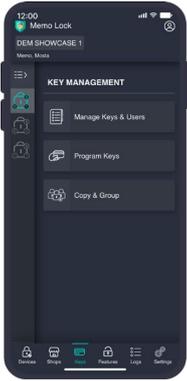

The network name will be shown accordingly.

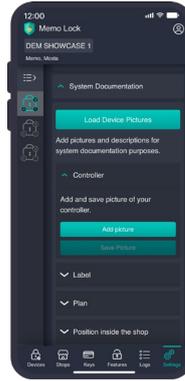

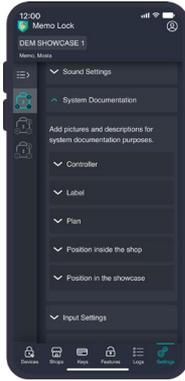

If you change a network connection, it is important to restart the controller by disconnecting and connecting power again, and restarting the app by closing and opening it again.

SYSTEM DOCUMENTATION

USE THE DEVICE IMAGE FEATURE AND TAKE PICTURES FROM INSTALLATION, FUTURE MAINTENANCE WILL BE MUCH MORE EASY AND A SYSTEM DOCUMENTATION CAN BE CREATED.

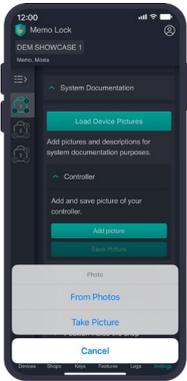

Tap on “Settings” from footer menu.

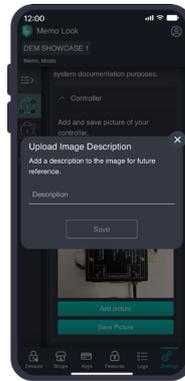

Tap v to open “Picture Settings” and tap “Controller” to add and save a picture of the installed controller.

Tap the “Add picture” button in the respective menu to add a picture.

Take the picture manually or load an image from the picture storage on your mobile phone.

Tap “Save Picture” to save the picture.

A window will open to add a description to the picture.

“Save” button will be enabled when description is added.

Wait for the confirmation window after saving.

The uploaded image is then visible under the respective accordion.

CONCLUSION

By following this guide, you will be able to **SET UP** your system consisting of **MEMO AIR2-LINE** and **DEM EVO3** devices using **MEMO LOCK APP**. For additional support, contact the MEMO team via the official website or the technical support information provided in the product materials.

Thank you for choosing the most versatile and powerful security system.
